ENDNOTES

- 1. CRM Sales Gross and the Dealer Dashboard disagree on the delivered/sold count for this week (7 delivered-sale rows vs 6 sold). Both figures are shown unreconciled; neither is treated as authoritative pending review.
- 2. Provisional / directional figure. The governed Sales-only gate quarantined this VinSolutions family because the report's hidden Lead Intent metadata includes Parts/Service and cannot be separated after aggregation; it is a strong operational signal, not strict accepted proof.
- 3. Retrospective: the weekly pool includes completed / cancelled / no-show records and is not necessarily presently actionable; review the confirmation workflow.
